

Assignment 01

Windows Shell

Due at beginning of class on June 3 (Tuesday)

Before we start programming, I want to make sure that you're comfortable using the Windows Explorer and the Windows command line. To do that, I want you to complete the **Windows Shell tutorial** at:

<http://www.horstmann.com/bigj/help/windows/tutorial.html>

Create a document using any word processor you like. Here are the requirements:

- Put your name and the date on the top of the first page
- Walk through each exercise and copy and paste the question into your document. Then, add your answer following the question so that it is easily readable.

Submit a PDF document named **LastFirst_hw01.pdf** to complete the exercises. It is very important that you use exactly this format for submitting your assignment: your last and first name must match the name on my roster, you must have an underscore, and you must spell the assignment file exactly as I've indicated here. If you do this at home (using Word or Wordpad), use the software in the lab (OpenOffice Writer) to generate your PDF file. Drop the completed file in my submissions folder (**Q:\faculty5\sgilbert\cs170\submissions**)
