

Assignment 04

Using Objects

Due before class on June 12 (Thursday)

Using the BlueJ Console Program template, complete problems P2.4, P2.8 and P2.10 on pages 75-77 of your textbook. If you use WileyPlus, then you'll find these problems at the end of Chapter 2.

Submit a single PDF document containing:

- the source code for each program
- a screen-shot showing your program running.
- another screen-shot showing the result of running Checkstyle on your code. Make sure you have set the Checkstyle configuration file to cs1705_checks.xml. Make sure you correct any Checkstyle errors before doing the screen-shot.

Name your document **LastFirst_hw04.pdf** and drop it in my submissions folder on the Q: drive.
