

Assignment 11

Using the if Statement

Due before class on June 30 (Monday)

Using **only** simple **if** and **else** statements complete the following five exercises in the **Warmup** section of <http://www.javabat.com>. Do **not** use nested **if** statements; do **not** use any of the binary Boolean operators (**&&** **||**). You *may* use the Boolean not operator(**!**).

- **sleepIn**
- **diff21**
- **makes10**
- **nearHundred**
- **front3**

Note that these assignments have help available if you get stuck. Most of the JavaBat exercise we'll do won't have any additional help available.
